ONLINE PURCHASING OF ELECTRONICS & ELECTRICAL GOODS

Submitted By : Pooja Nagare

1. Overview

“Online Purchasing of Electronics and Electrical goods” project enables the Customer to buy electronic or electrical item or product as per their needs, It gives detailed information about the product availability, cost and guarantee. Offline stores can also be a part of these reselling products, in online mode.

The online purchasing system allows the Buyer to check the location of reseller to get electronics or electrical product on given period of time, Also cancellation of the product can be done before the product gets shipped from the reseller’s location.

The “Online purchasing of electronics & electrical goods” is firstly “Administrator”, can give the reply, take the reviews from the buyers/customer and updation of the application or website is done. Secondly, “Reseller” is the one who gives the product in detailed information or the product in well mannered to the buyer. Lastly, it is the “Buyer”, who take the overlook on the electronics and electrical good by just seeing the product online or on website.

2. Objectives
